

Work
smarter,
not harder

Iva Habeš Lončarić &
Ana Dobraš

LEARNING POINTS

1

Why use AI tools
in English
language
teaching

2

Give examples of
AI in day-to-day
life.

3

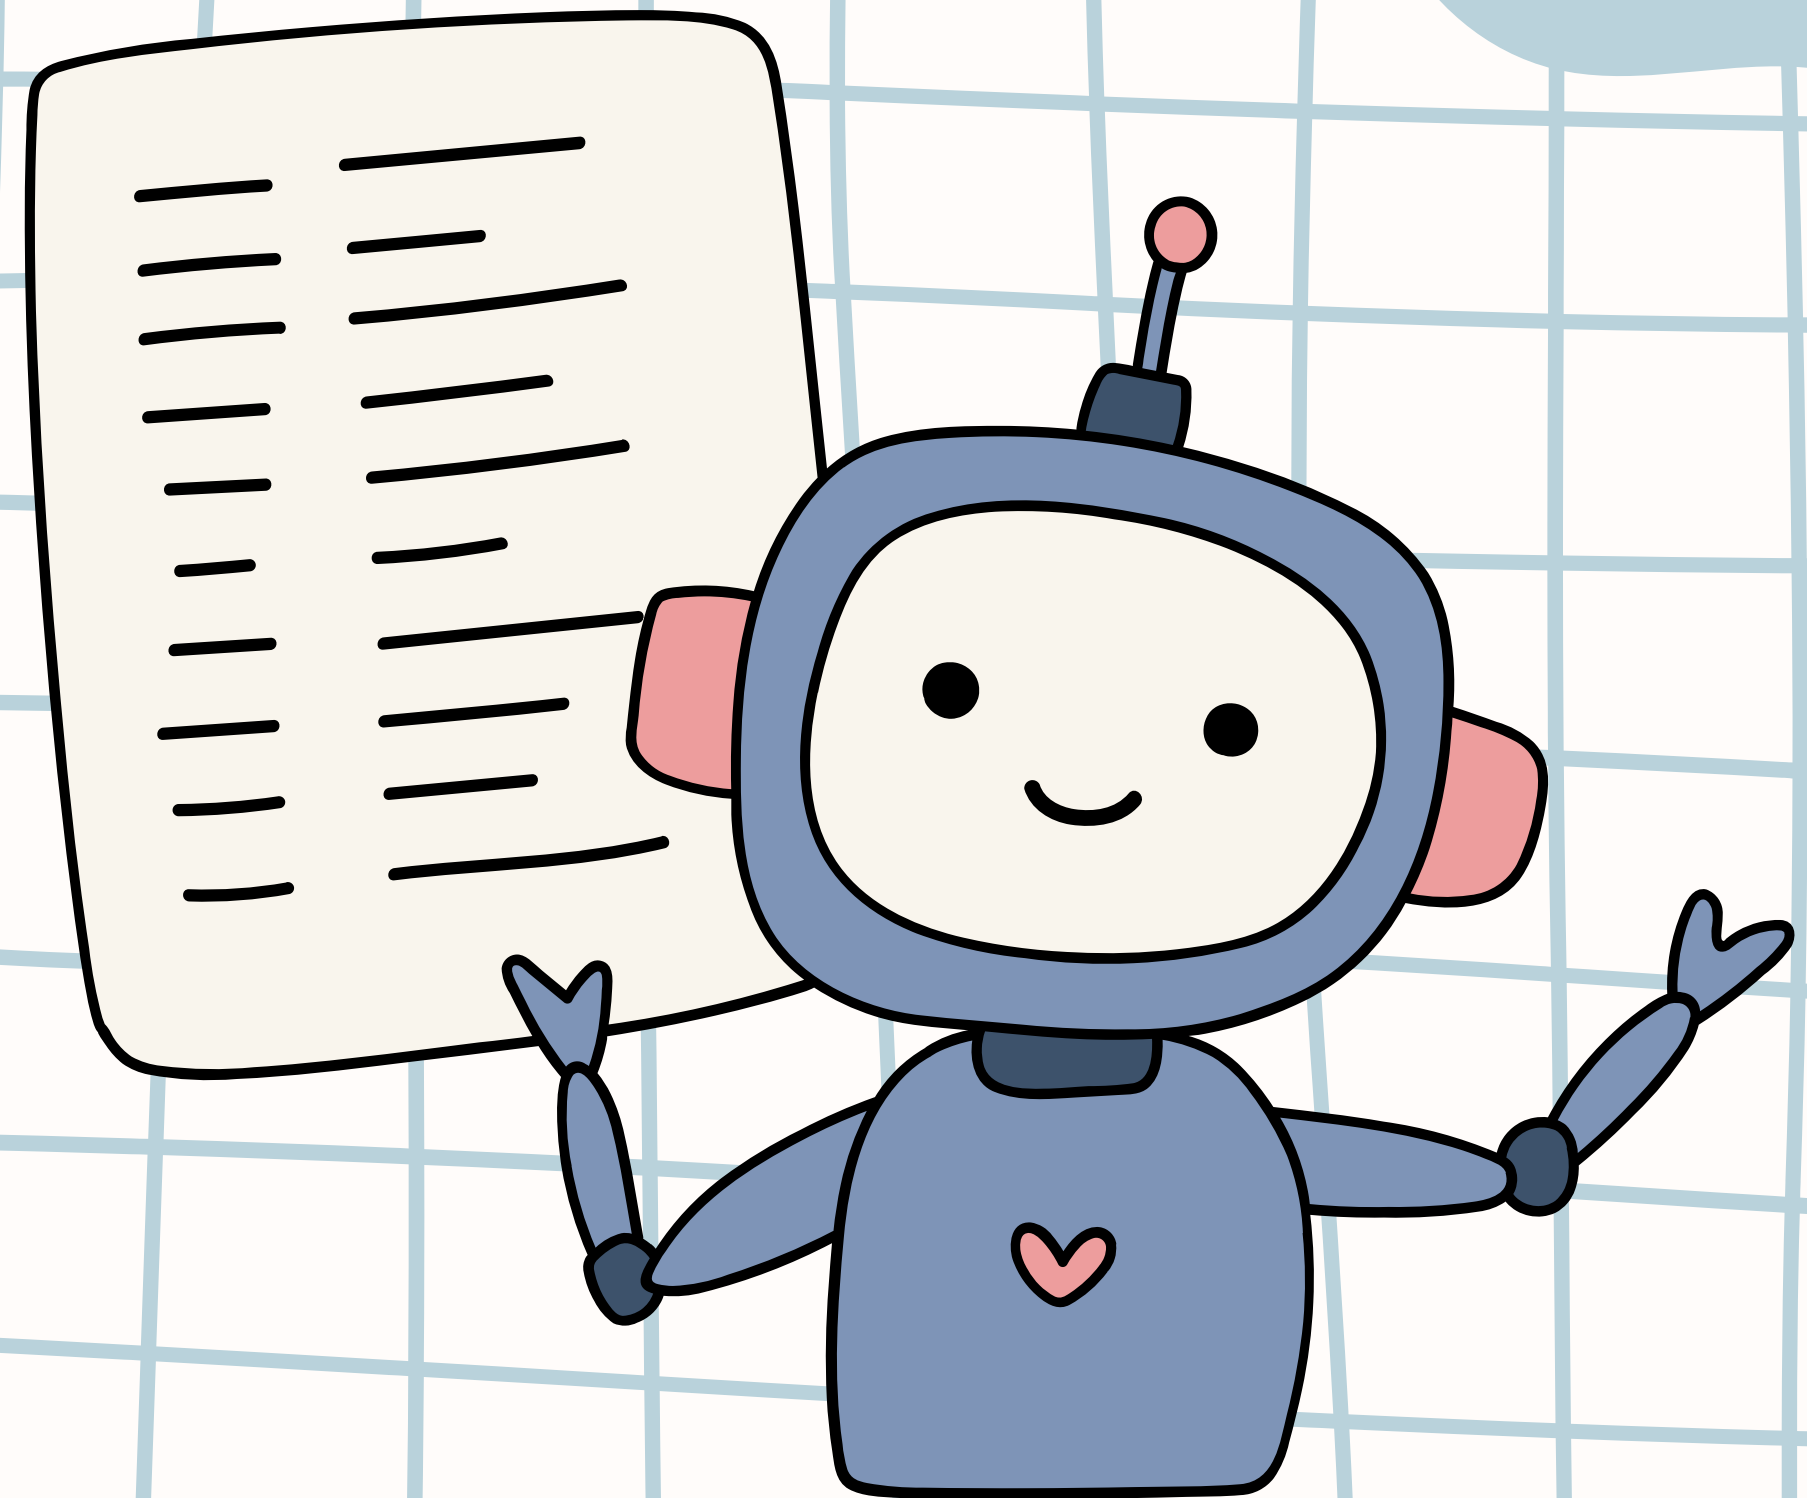

Explain the benefits
and concerns
around AI.

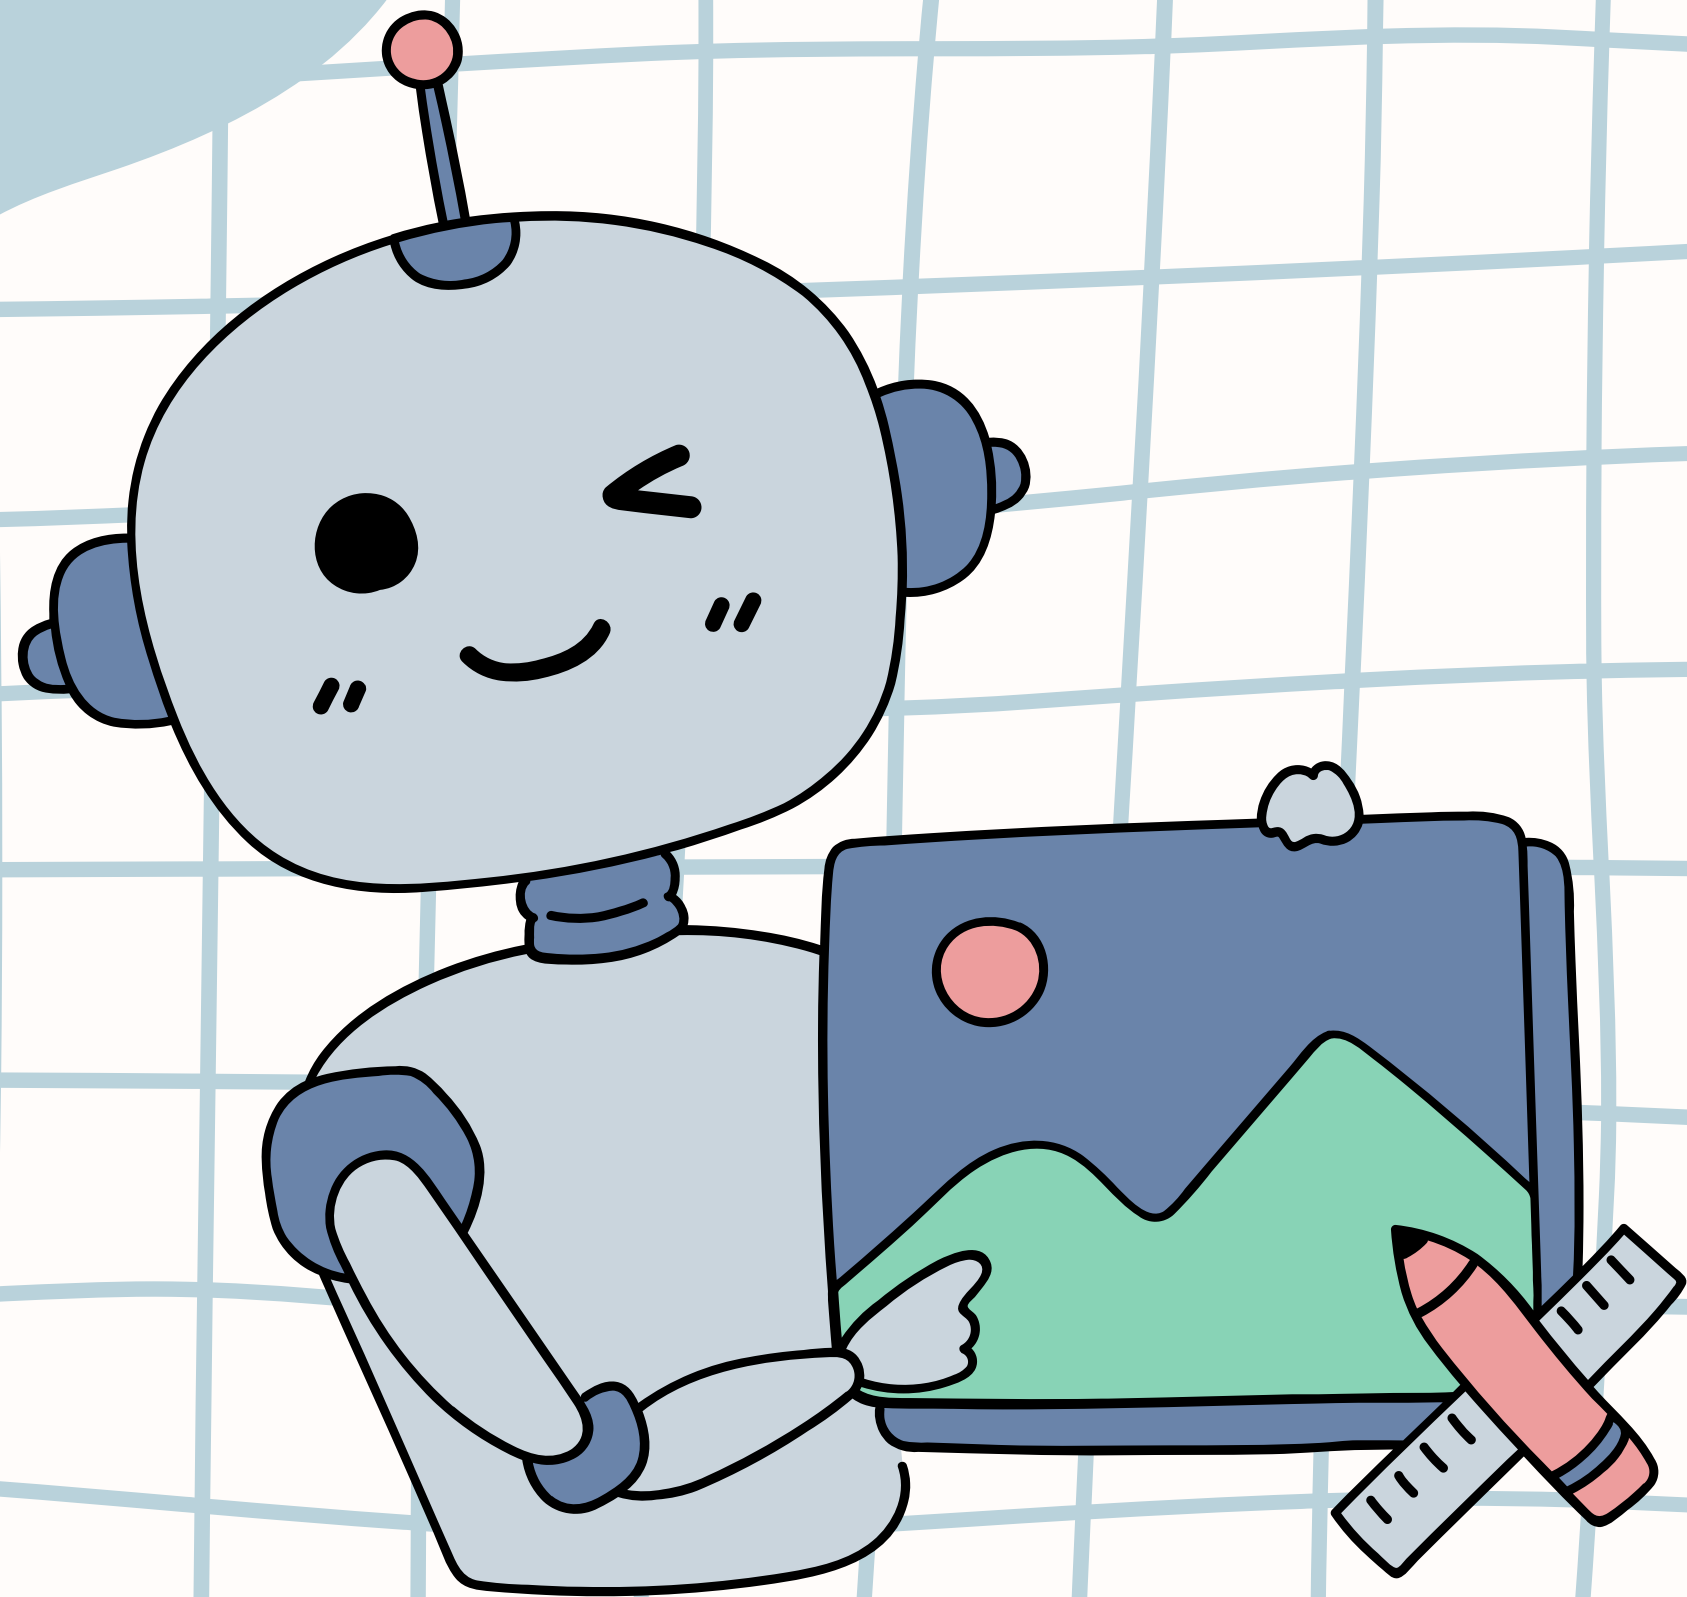

STARTER QUESTION

What does 'AI' stand for?

DEFINITION

Artificial intelligence (AI) is technology that enables computers to carry out tasks which normally require human intelligence and thinking.

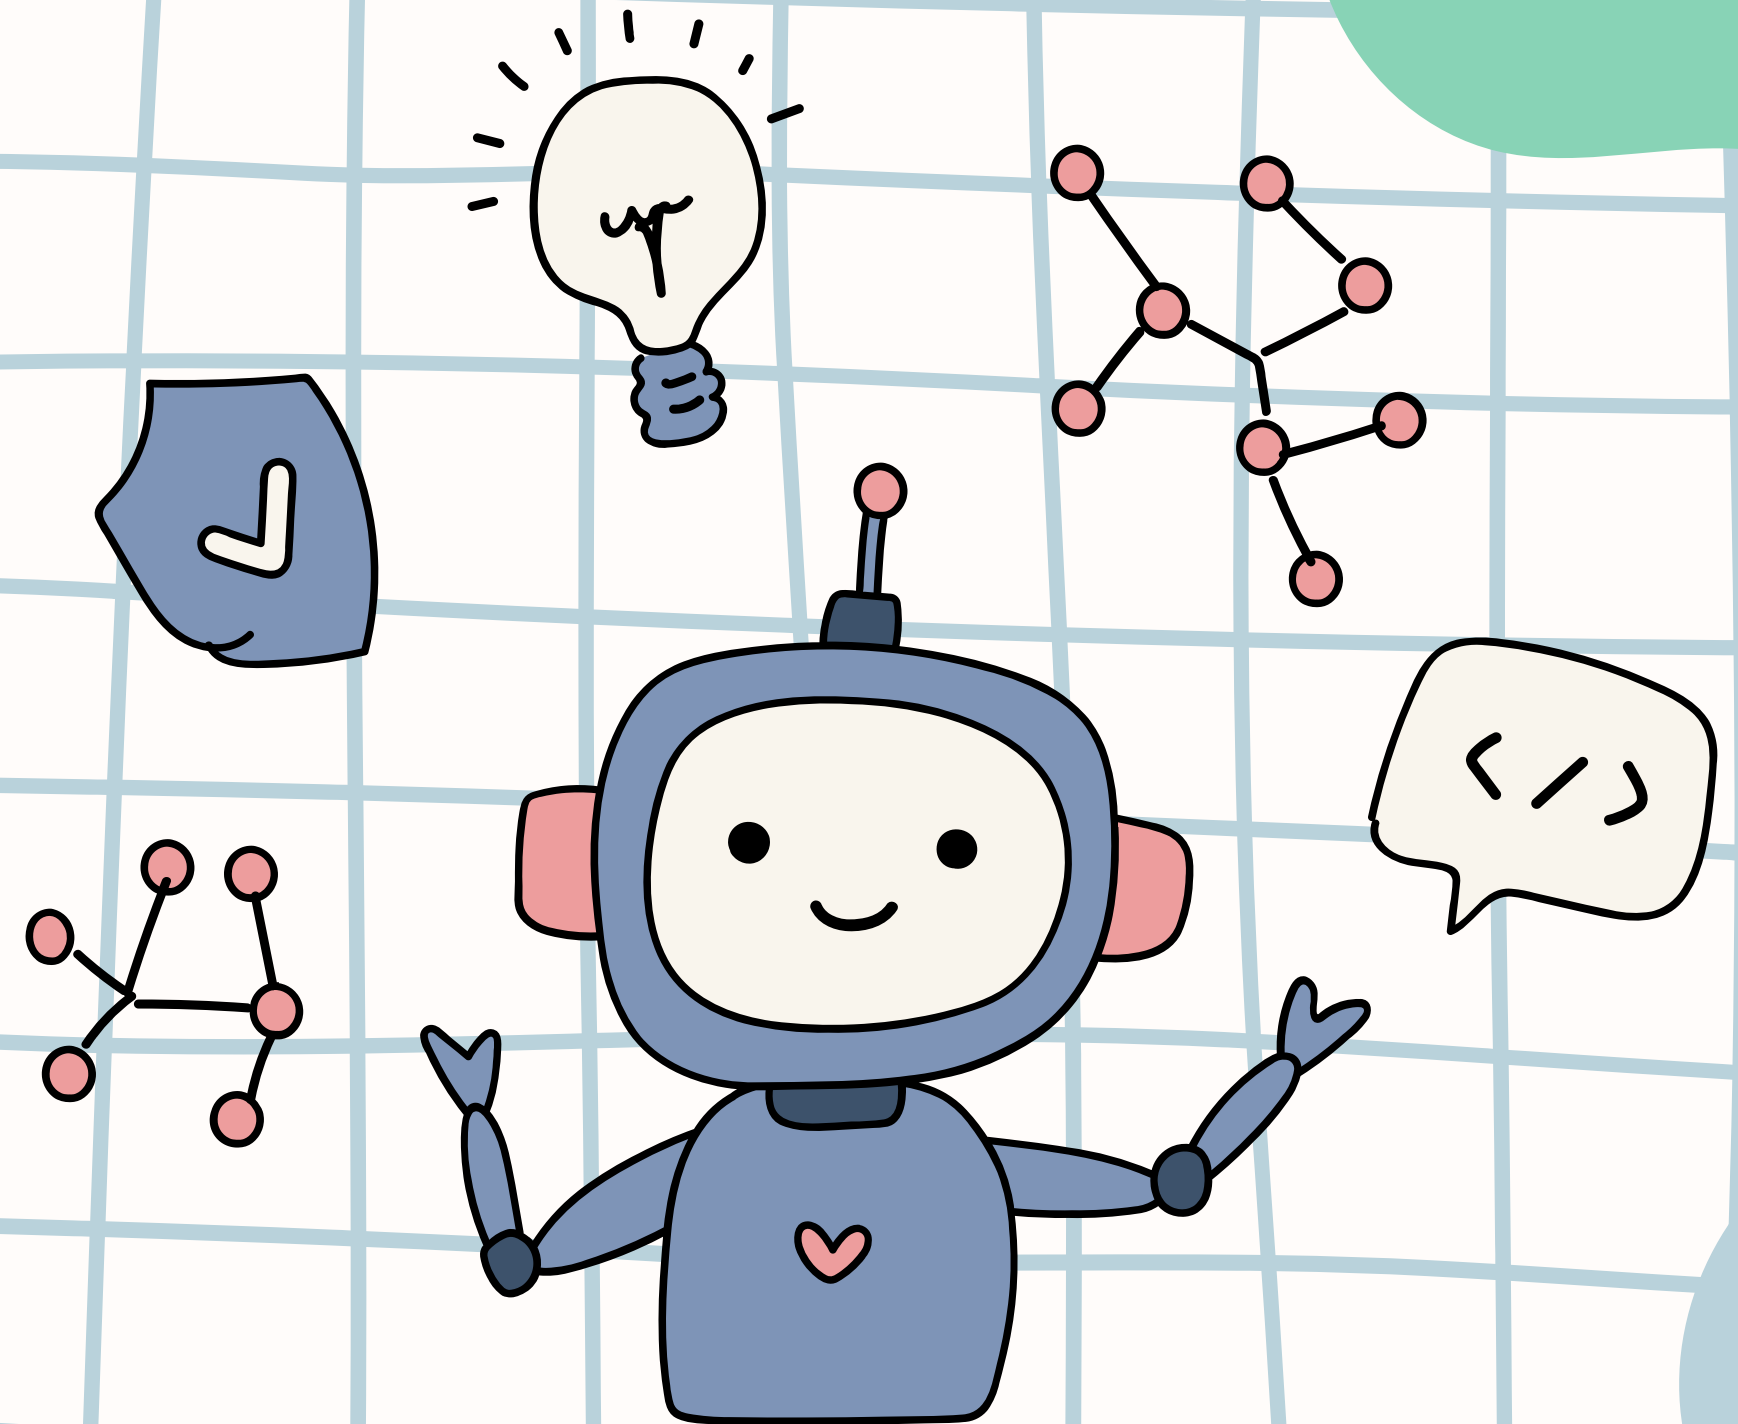

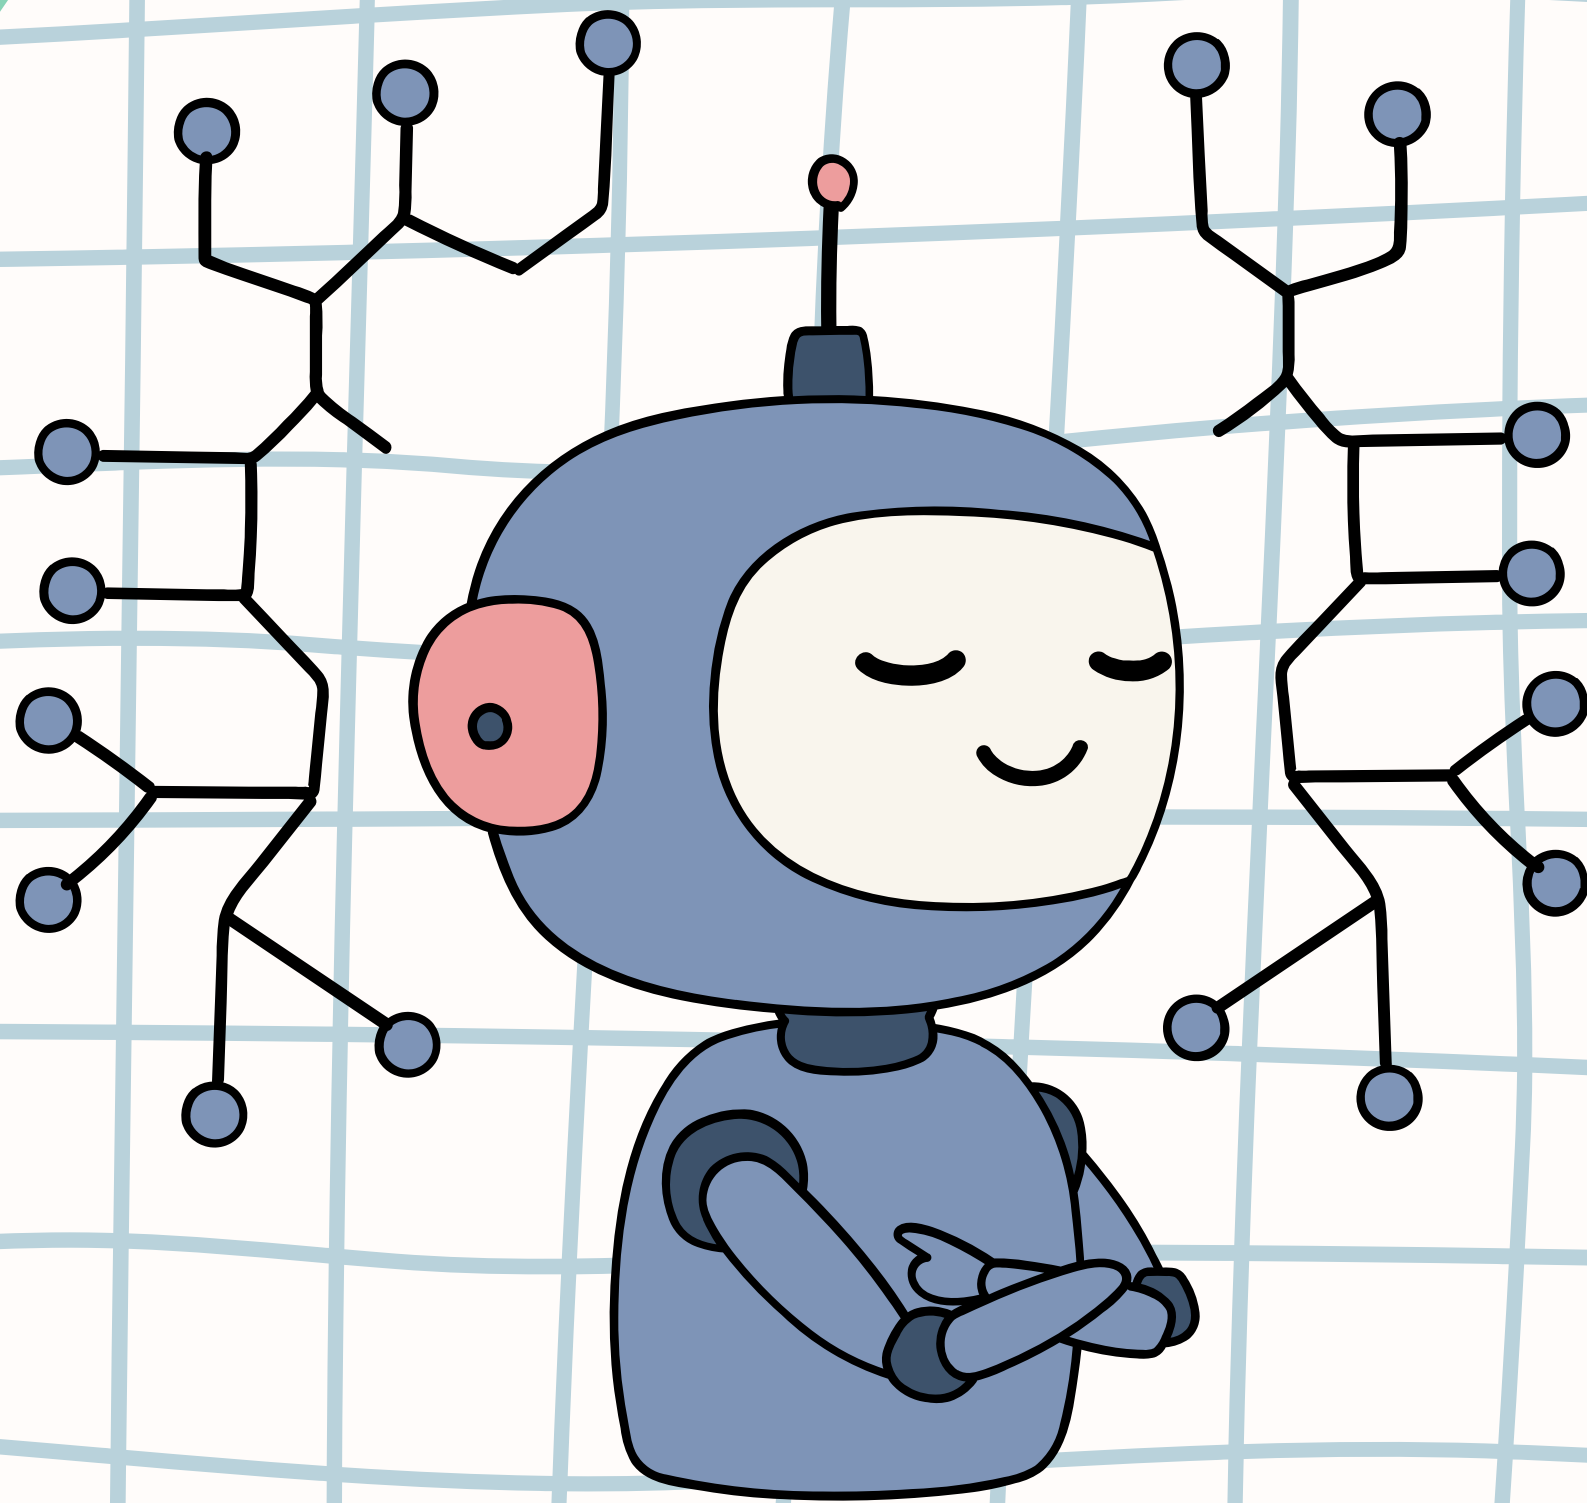

HISTORY

AI was first looked at in the 1950s. By the 1960s, scientists were teaching computers how to mimic human decision making using algorithms. Algorithms are like rules which a computer can use to help solve a problem.

BENEFITS

- Less human error ???
- Makes quick decisions
- Can handle lots of information in short time
- Fast, easy, and available

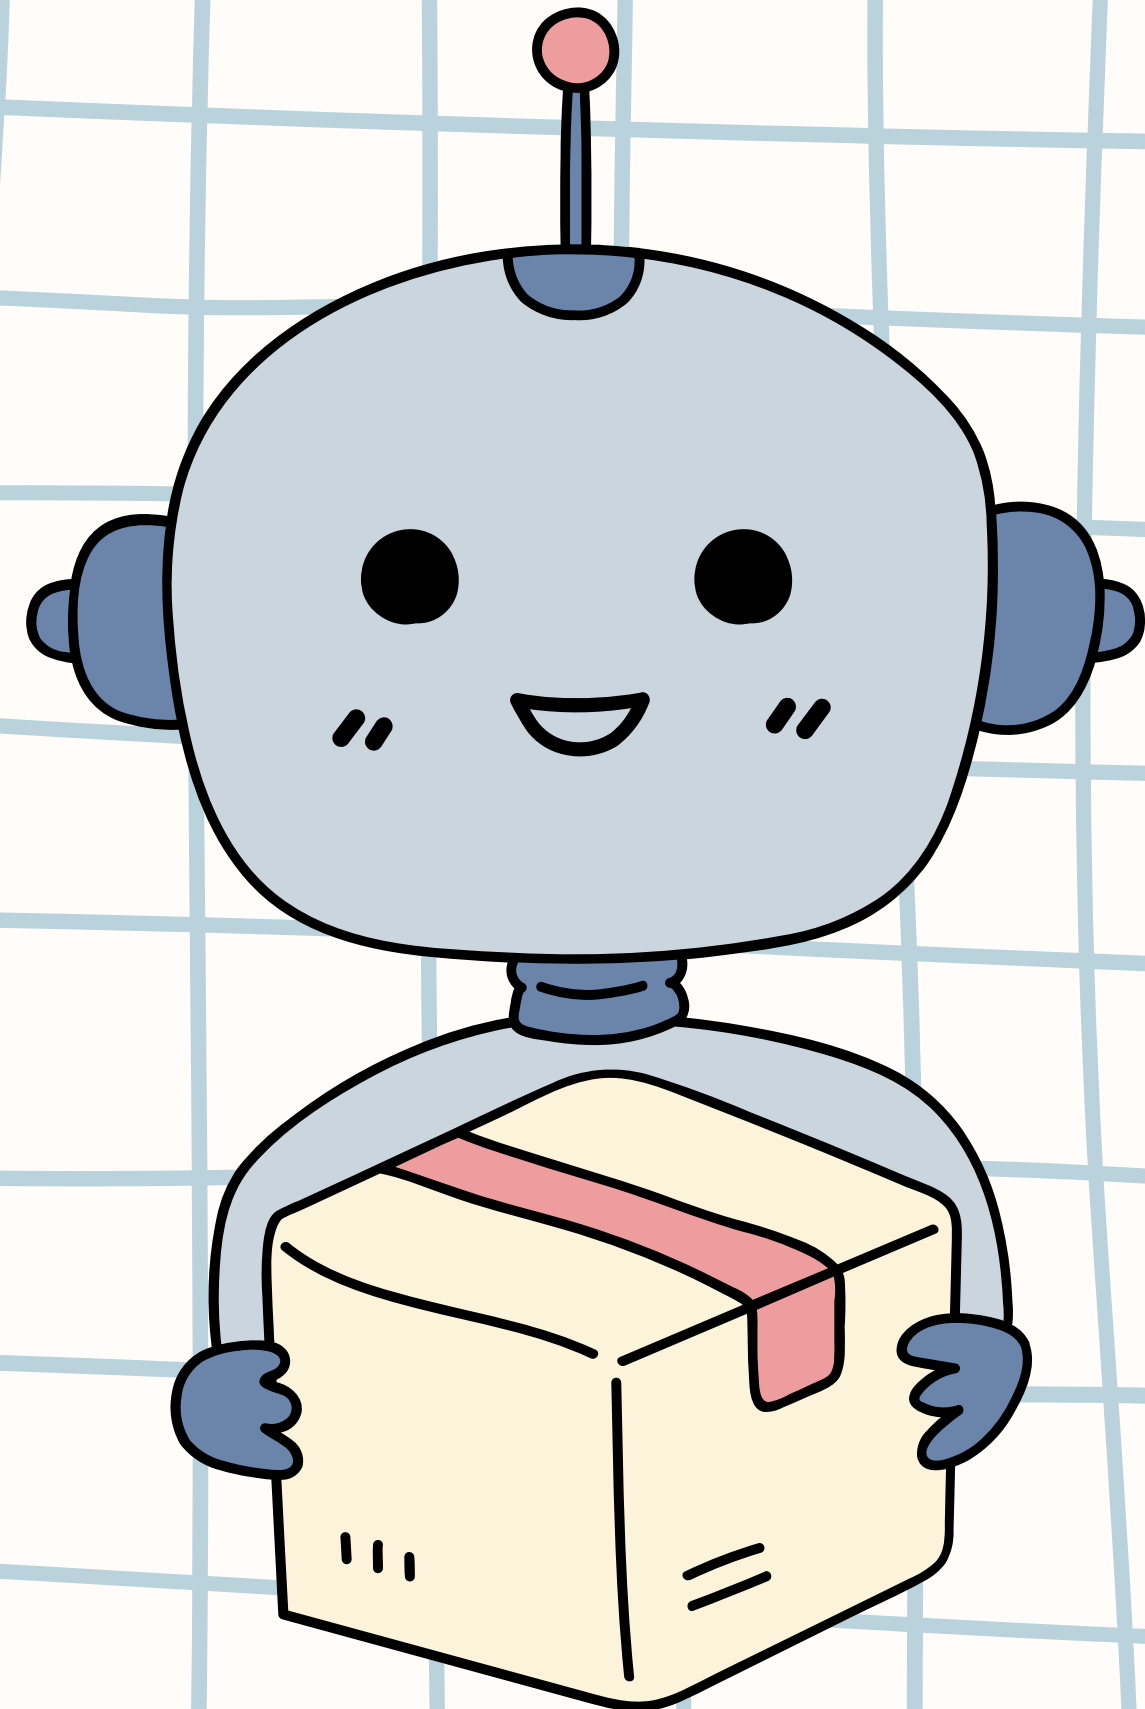

CONCERNS

AI could invade privacy, replace lots of jobs and make us overly reliant on computers. Some people are worried that if we develop computers too much, they could become smarter than humans.

INTRODUCTION OF THE THREE TOOLS

- Suno ai,
- Gamma.app
- ClickUp

SUNO

- Suno is a generative AI music creation platform developed by Suno Inc., allowing users to create realistic songs with vocals and instrumentation from text prompts.

HANDS-ON ACTIVITY:

-Task: Type in or copy lyrics into Suno AI
and create a song

GAMMA.APP

- AI tool for creating presentations, documents, and visual stories in just a few minutes.
- Generates content from a short prompt and automatically designs slides.
- Ideal for quick preparation of teaching materials or assignments

HANDS-ON ACTIVITY:

- open Gamma.app (no installation required).
- Task: Enter a topic (e.g., "English idioms for beginners") and generate a presentation.

CLICKUP

- It helps you organize and manage all your tasks, projects, and documents in one place, so you stay focused and save time.
- It can automate repetitive actions, quickly find information, and summarize updates, making your workflow more efficient.
- It supports you with smart suggestions, reminders, and AI-powered tools to boost your productivity and help you achieve your goals faster.

LIVE DEMO:

-presentation of the application and some of its features

SOME USEFUL WEBSITES

- resourceboy.com
- printablecreative.com
- carcarekiosk.com
- human.biodigital.com
